

## Appendix D: Cultural Heritage Assets Gazetteer

<b>Asset Number</b>	1
<b>Asset Name</b>	Byres Of Murthly, Tunnel / Pass Of Birnam Railway Tunnel
<b>NGR</b>	NO0566539058
<b>Type</b>	Railway Tunnel
<b>Designation</b>	None
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	None
<b>HER Reference</b>	MPK7978
<b>Value</b>	Low
<b>Condition</b>	Good
<b>Description</b>	Tunnel [NAT] OS 1:10,000 map, 1982. [1]
<b>References</b>	[1] Perth and Kinross Historic Environment Record

<b>Asset Number</b>	2
<b>Asset Name</b>	Bee Cottage, Pass Of Birnam
<b>NGR</b>	NO0526639166
<b>Type</b>	Cottage
<b>Designation</b>	Category B Listed Building
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	11144
<b>HER Reference</b>	MPK2269
<b>Value</b>	Medium
<b>Condition</b>	Good
<b>Description</b>	Single-storey asymmetrical, rubble-built in Murthly estate manner with broad-eaved roof, bay window, fanciful finials to gables, diamond bordered glazing c.1840. [1] No additional information. [2]
<b>References</b>	[1] Historic Scotland [2] Perth and Kinross Historic Environment Record

<b>Asset Number</b>	3
<b>Asset Name</b>	Birnam Burn, Bridge
<b>NGR</b>	NO0571139520
<b>Type</b>	Road Bridge
<b>Designation</b>	Category C Listed Building
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	13737

<b>HER Reference</b>	MPK13548
<b>Value</b>	Low
<b>Condition</b>	Good
<b>Description</b>	Single arch, rubble, no parapets, probably 18th cent. [1] No additional information. [2]
<b>References</b>	[1] Historic Scotland [2] Perth and Kinross Historic Environment Record

<b>Asset Number</b>	4
<b>Asset Name</b>	Birnam Burn, Roman Style Bridge
<b>NGR</b>	NO0570339536
<b>Type</b>	Road Bridge
<b>Designation</b>	Category A Listed Building
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	11145
<b>HER Reference</b>	MPK2275
<b>Value</b>	High
<b>Condition</b>	Good
<b>Description</b>	6-arch over deep ravine in Roman aqueduct manner: rustic masonry: heavy corbelled refuge at each spandril, crenelated parapet and wide approaches. Mid 19th cent. [1] No additional information. [2]
<b>References</b>	[1] Historic Scotland [2] Perth and Kinross Historic Environment Record

<b>Asset Number</b>	5
<b>Asset Name</b>	Dalpowie Hospital, Dalpowie House (Site Of)
<b>NGR</b>	NO0514039660
<b>Type</b>	Hospital, Country House
<b>Designation</b>	None
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	None
<b>HER Reference</b>	MPK12029
<b>Value</b>	Low
<b>Condition</b>	Unknown
<b>Description</b>	NMRS REFERENCE: Unable to locate at time of upgrade, 30.01.2110. There are two hospitals in the area and one on 1st edition Perthshire OS map, NO03NE, 0514 3966. EXTERNAL REFERENCE: SCOTTISH RECORD OFFICE:- Measure and Valuation of the work done on the hospital. Valuation amounts to #106.19.3, 1790.

	<p>Measurer: Thomas Menzies. GD 121/Box 49/279. The Hospital. Request to Sir George Steuart of Grandtully from Lewis Grant. He asks for 2 rooms at the hospital. He wishes to fit them up at his own expense in lieu of rent and would also like a space of ground before the house for a garden, 1822. GD 121/Box 100/Vol.xix/100/1. Building of the Hospital. Included in the balance of the account between Sir George Steuart of Grandtully and Thomas Halliburton for work done 1735-1737, 1750. GD121/Box/49/278. Wright work done at the hospital belonging to Sir George Steuart of Grandtully. Account amounting to #151.6.5 from Thomas Hallyburton, 1736-1737. GD 121/Box49/278. NMRS REFERENCE House depicted on the 1st edition of the OS map (Perthshire, 1854, sheet LXII, 14). [1]</p>

<b>Asset Number</b>	6
<b>Asset Name</b>	Rohallion, Buffalo Hut
<b>NGR</b>	NO0444339883
<b>Type</b>	Hut
<b>Designation</b>	Category B Listed Building
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	50775
<b>HER Reference</b>	None
<b>Value</b>	Medium
<b>Condition</b>	Good
<b>Description</b>	<p>Probably circa 1840. Tiny, intricately-detailed, circular hut sited high on hill overlooking Buffalo Park, part of Rohallion's designed landscape. Incorporating conical roof, large gabled porch, tall circular stack projecting at rear, and deep-set roundheaded openings with narrow voussoirs, some openings with rubble infill (original), some with boarded timber doors and some appearing as lancets. Mixed rubble construction with larger rubble base and quoin stones, some squared. Overhanging eaves with exposed rafters.</p> <p>FURTHER DESCRIPTION: 2-leaf boarded timber door with decorative ironwork hinges, and window openings also with timber boarded doors/shutters. Cobbled floor. Grey slate roof.</p> <p>INTERIOR: rustic half-round timbered walls and low benches to porch and hut interior, latter also with large stone fireplace.</p> <p>Built for Sir William Drummond Stewart of Murthly Castle, this astonishing, well-detailed hut was erected to house two Native Americans who had accompanied Sir William on his return to Murthly at the end of the 1830s. The Indians were themselves accompanied by Antoine, a 'half-breed' trained as a butler, who was intended to restrain them from any savage or wild behaviour. Sir William had so fallen in love with the American Wild West, that he shipped some buffalo across to Scotland, and built the Buffalo Park at Rohallion, bringing the Indians to look after the animals. The buffalo were cared for by Lord Breadalbane at Taymouth until buffalo grass seed had ripened in 'an enclosure ... not far from Rohallion measuring five or six miles in circumference. The area was enclosed by a stone fence topped by several strands of thick wire'. Much of the 'stone fence' enclosing Buffalo Park is still evident today (2006), with monumental square-section gatepiers flanking openings. The Buffalo Hut is sited high up on a hill to the NW of the Park, with a crenellated wall forming a lookout with spectacular views across the Perthshire countryside to the River Tay and beyond. When newly built, views of Murthly Castle would have been clearly visible from this location. 'In August, 1842, restless again, Stewart decided on one last farewell expedition to the American west. To the relief of the locals, he took his three savages with him'. However, during his absence 'Stewart found his buffaloes had got out of hand. One had killed a postman and others had broken free to roam the hills. They were reluctantly given to Lord Breadalbane and ended their days at Woburn Abbey's nature park', (Scottish Memories). [1]</p>

	No additional information. [2]

<b>Asset Number</b>	8
<b>Asset Name</b>	Newtyle Standing Stones
<b>NGR</b>	NO0450141067
<b>Type</b>	Standing Stones
<b>Designation</b>	Scheduled Monument
<b>Scheduled Monument Reference</b>	1541
<b>Listed Building Reference</b>	None
<b>HER Reference</b>	MPK2482
<b>Value</b>	High
<b>Condition</b>	Good
<b>Description</b>	<p>The monument comprises two standing stones of prehistoric date. The monument was first scheduled in 1930 and rescheduled in 1965. It is being rescheduled yet again in order to clarify the extent of the scheduled area.</p> <p>The monument lies in mixed woodland at about 70m OD. It comprises two standing stones, aligned N-S and set about 3m apart. The N stone is about 2.1m high, and the S stone is approximately 1.6m high. The monument relates to ritual activity of Neolithic or Bronze Age date.</p> <p>The area proposed for scheduling comprises the remains described and an area around them within which related material may be expected to be found. It is a truncated circle on plan with a maximum diameter of 30m, bounded by the edge of a road to the SW, as marked in red on the accompanying map extract. Above-ground elements of the modern boundary fence are excluded from the scheduling. [1]</p> <p>This monument comprises a pair of prehistoric standing stones located to the NE of the A984 road, unusually positioned at the foot of a steep slope at the rear of a terrace overlooking the River Tay. The N stone, which leans slightly to the W, rises to a height of 2.1m, and the S stone is 1.6m high. It is unlikely that these standing stones are the remains of a stone circle, as has been suggested in the past.</p> <p>(NO 0449 4107) Standing Stones (NR) OS 6" map, Perthshire, 2nd ed. (1901)</p> <p>Two standing stones, possibly the remains of a circle (1).</p> <p>A pair of standing stones, 9' apart and aligned N-S. "A" measures 7'2" x 4'9" x 1'9" and "B" is 4'9" x 4'2" x 1'6" (4).</p> <p>A "two-poster" as described. There is no evidence to suggest a stone circle. Surveyed at 1:10560 scale.</p>

	<p>Visited by OS (RD) 22 February 1971</p> <p>This pair of standing stones lies to the NE of the public road (A984) and is unusually situated at the foot of a steep slope at the rear of a terrace overlooking the River Tay. The N stone, which leans slightly to the W, rises to a height of 2.1m, and the S stone is 1.6m high.</p> <p>Visited by RCAHMS (JRS) 8 October 1986. [2] A site inspection on 6 July 2015 observed that the setting supports the understanding of the relationship of the monument's chosen location within the wider landscape but is partly compromised by roadside planting associated with the A984. [3]</p>

<b>Asset Number</b>	9
<b>Asset Name</b>	Newtyle Quarries (Site of)
<b>NGR</b>	NO0449441276
<b>Type</b>	Slate Quarry, Road, Adit
<b>Designation</b>	None
<b>Scheduled Monument Reference</b>	None
<b>Listed Building Reference</b>	None
<b>HER Reference</b>	MPK14525
<b>Value</b>	Negligible
<b>Condition</b>	Unknown
<b>Description</b>	The 1st and 2nd editions of the OS 6-inch maps depict the quarrying complex at Newtyle. It consists of at least five quarries on either side of the modern road. One quarry is accessed by a tunnel or adit. A small rectangular building above this quarry is marked on the 1st edition (1867) as a 'ruin' indicating that quarrying may have ceased by the late 19th century. [1]

<b>Asset Number</b>	16
<b>Asset Name</b>	Dunkeld And Birnam Station, Signal Box
<b>NGR</b>	NO0323041552
<b>Type</b>	Signal Box
<b>Designation</b>	Category B Listed Building
<b>Scheduled Monument Reference</b>	None

<b>Reference</b>	
<b>Listed Building Reference</b>	52055
<b>HER Reference</b>	MPK16694
<b>Value</b>	Medium
<b>Condition</b>	Good
<b>Description</b>	<p>Highland Railway Company, 1919. 2-storey signal box; brick with weather-boarding and multi-pane glazing to cabin (operating room) accessed by extended timber forestair to half-gabled entrance porch outshot at upper level. 2 small windows to locking room. E elevation: all brick with small window to upper right and tall, wallhead stack to centre, set behind eaves. Forestair with trackside viewing platform extension.</p> <p>Signal boxes are a distinctive and increasingly rare building type that make a significant contribution to Scotland's diverse industrial heritage. Of more than 2000 signal boxes built across Scotland by 1948, around 150 currently survive (2013) with all pre-1948 mechanical boxes still in operation on the public network due to become obsolete by 2021. The 1919 signal box at Dunkeld is a rare example of a Highland Railway box design. It is intervisible with the 1856 Dunkeld and Birnam Station (see separate listing) adding group value and contextual railway interest. One other example of this type of Highland Railway Company signal box is at Boat of Garten Station (see separate listing) on the preserved Strathspey Railway. The Dunkeld box has been altered in recent years including the replacement of its slate roof with corrugated iron. The 1856 Dunkeld and Birnam Station (see separate listing) is an outstanding example of Scottish railway architecture by the renowned architect, Andrew Heiton Junior. The villages of Birnam and Dunkeld are early Highland resorts in a setting of great natural beauty. The Perth &amp; Dunkeld Railway obtained its Act of Parliament on 10 July 1854 for a line between Stanley Junction and Birnam. Dunkeld (originally Birnam) Station was opened on 7 April 1856 and was a terminus until the line was extended to Pitlochry seven years later. The station was first served by the Scottish Midland Railway and then the Scottish North Eastern Railway before becoming part of the Highland Railway. Listed as part of the Scottish Signal Box Review (2012-13). [1]</p> <p>This signal box, controlling the southern approach to Dunkeld and Birnam Station, does not appear on the first or second edition OS maps. The first edition OS survey shows that the site of the modern signal box was originally occupied by a spur line and it's corresponding engine shed. This structure appears to have been demolished and the line taken up by the time of the second edition. A signal box for this junction is not listed on the first edition OS, but by the time of the second edition one is depicted (marked "SB") around 70 metres ESE of it's modern replacement. [2]</p> <p>Site inspection on 6 July 2015 [3]</p>

<b>Value</b>	High
<b>Condition</b>	Good
<b>Description</b>	<p>Andrew Heiton, Junior, 1856. Single-storey, 7-bay, near-symmetrical, multi-gabled railway station. Squared and snecked whinstone rubble with sandstone dressings. Open, central porch with pointed arch to front and shouldered arches to sides. Advanced gables flanking with stone mullioned tri-partite glazing. Decorative barge-boards and pendant timber eaves. Tall octagonal and square-cut ridge stacks. Slate roof.</p> <p>Single storey addition to SE. Roughly 12-bay awning to platform elevation, supported by wall-hung cast-iron brackets with decorative spandrels.</p> <p>FOOTBRIDGE: (Map Ref: NO 03107 41646): steel and cast-iron lattice-girder footbridge of standard Highland Railway design.</p> <p>Dunkeld and Birnam Station is an outstanding and well-detailed example of Scottish railway architecture by renowned architect, Andrew Heiton Junior. The villages of Birnam and Dunkeld are an outstanding example of an early to mid 19th century Highland resort in a setting of great natural beauty and the design of the station buildings reflects their resort status. The villages were largely developed following the opening of the railway between 1856 and 1863. The Perth &amp; Dunkeld Railway obtained its Act of Parliament on 10 July 1854 for a line between Stanley Junction and Birnam. Dunkeld (originally Birnam) Station was opened on 7 April 1856 and was a terminus until the line was extended to Pitlochry seven years later. The station was first served by the Scottish Midland Railway and then the Scottish North Eastern Railway before becoming part of the Highland Railway. A 1919 signal box (see separate listing) by the Highland Railway Company, is located to the east and is intervisible with the station adding contextual and group interest. There is one other listed example of this design of signal box, on the preserved Strathspey Railway at Boat of Garten (see separate listing). List description revised as part of Scottish Signal Box Review (2012-13). [1]</p> <p>(Location cited as NO 031 417). Dunkeld and Birnam Station, opened by 1856 by the Perth and Dunkeld Rly, architect Andrew Heiton. A two-platform through station with the main building on the up platform, a fine single-</p>

	<p>storey structure with two ornamental gables and a projecting porch at the rear. On the platform side is a bracketed awning with a steeply-pitched roof. There is a small wooden shelter on the up platform. Other features are a rubble goods shed, a neat wooden coal office, and a lattice-girder footbridge. J R Hume 1977.</p> <p>This intermediate station on the Perth (Stanley Junction) - Inverness main line of the former Highland Rly was opened as Birnam and Dunkeld Station by the Scottish Midland Junction (Perth and Dunkeld) Rly on 7 April 1856. It was successively renamed Dunkeld Station on 1 December 1861, Dunkeld and Birnam Station on 1 December 1903, Dunkeld Station on 12 May 1980 and Dunkeld and Birnam Station on 13 May 1991. The station remains in regular passenger use under the last name. Information from RCAHMS (RJCM), 4 September 2000. R V J Butt 1995.</p> <p>Architect: Andrew Helton, Junior, 1856. [2]</p> <p>Site inspection undertaken on 6 July 2015 for DMRB Stage 2 chapter. [3]</p>

<b>Description</b>	William Slater to design of Richard Cromwell Carpenter, 1856-58; tower belfry stage by James Ramsay, 1882; low N aisle and baptistery by Norman & Beddoe, 1883; choir stalls by Rev Edward Sugden 1889; organ by Forster and Andrews 1874, rebuilt by John R Miller 1908. Well-detailed gothic church with 3-bay nave, aisle chancel, square 3-stage crenellated tower and unusually fine interior with Burne-Jones windows by William Morris & Co, stencilling remnants and furnishings of note. Squared, coursed and snecked rubble with ashlar dressings. Raked base course, band course and machicolation to tower, angle buttresses, voussoirs, traceried windows and chamfered reveals.  FURTHER DESCRIPTION: entrance tower to SW with 2-leaf timber door and traceried oculus dwarfed by flanking projecting buttresses; aisle with Burne Jones windows and squat buttresses to NW under swept roof with diminutive ventilators; SE elevation of nave and chancel, latter with hoodmoulded recess below 2-light window; large 3-light window to cross-finnialled NE gable.  Fine coloured glass or coloured margins to diamond-pattern leaded lights throughout. Grey slates. Shouldered stack raised in brick at vestry; ashlar-coped skews to stepped roof.

	<p>INTERIOR: unusually fine interior with good decorative scheme in place, including open timber roof with simple cross bracing, limewashed walls to nave and aisle, evidence of stencilling at chancel, columned N arcade, fixed timber pews and some tiled floors. Moulded chancel arch with carved head corbels and decorative stone septum with inset railings; sanctuary with stone and marble reredos, single seat sedile and piscine. Carved oak pulpit. Carved circular stone font at baptistry.</p> <p>STAINED GLASS: much fine figurative glass including Alexander and Evelyn Mary Low Memorial Windows in N aisle designed by Edward Burne-Jones and executed by Morris &amp; Co depicting 'King David and St John' of 1890 (designed 1866 and 1869) and 'Ruth and Mary' of 1904, designed 1886. E window Crucifixion by C E Kempe 1895 and chancel's S wall 'Moses and St John the Baptist' by James Ballantine &amp; Son 1864. [1]</p> <p>No additional information. [2]</p>

<b>Description</b>	<p>Dated 1862 and 1865. Baronial, long 2-storey and attic terrace block stepped in slope: 24 windows long, cantilevered 1st floor canted bay and corbelled to square with shaped gables 2nd floor at 6th 10th and 19th, corbelled circular angle turrets at ends of composition. Ashlar ground floor with arched openings, snecked local rubble above with ashlar dressings, architraves at no 3, gabled masonry dormers, slated roofs.</p> <p>Items 68-100 form B group with items 18-20 in original list. An outstanding example of an early-mid Victorian Highland resort in a setting of great natural beauty, built mainly following the opening of the Perth and Dunkeld Railway in 1856. In 1865 it was noted that the trade of Dunkeld and Birnam had suffered with the extension of the Railway. The main development was thus between 1856 and 1863, when Birnam was the terminus. Very completely preserved to date St Mary's Tower and Birnam House being the only serious losses while the only intrusion of any consequence has been a modern bungalow inserted between Birnam Hotel and Oransay.</p> <p>See MacLean, Dunkeld, its Straths and Glens (1865). Built for let in summer as lodgings for visitors. [1]</p> <p>No additional information. [2]</p>

<b>Description</b>	<p>Circa 1850. Good single-storey and attic mansion house of William Burn Jacobethan type. Single storey and attic, symmetrical W front 2-window and centre gable with canted bay, other fronts asymmetrical, open entrance porch on S later conservatory at SW gable. Local rubble with red sandstone dressings, gables and gablets curvilinear, lying panes, slated roof, octagonal shafted chimneys. Porch unfortunately harshly retooled consequent upon severe weathering. MacLean Dunkeld, Its Straths and Glens (1865). The first of the large villas at Birnam, built for P Wallace of Perth, probably to designs by Andrew Heiton who had been with Burn. In 1865 it belonged to Archibald Burns of Perth. <b>Description</b>	<p>Medieval buckle NO 03 42 Metal detecting by David Cormac in Birnam recovered a zoomorphic copper-alloy buckle, probably 13th-century; 24.9 x 23.2mm. It takes the form of a feline-looking creature (?probably a lion) cast in the round so that the head (with mouth agape, ears flattened and lentoid eyes) and the body (with tightly curled tail arching from the back) form the 'outer' long side of the buckle frame and the creature's two pairs of legs form the short sides. A plain narrow bar links the two pairs of feet and forms the 'inner' long side of the frame. This would have supported the tongue or buckle pin and the buckle plate, which would have formed the attachment to the end of a leather strap. The distinctive form of this buckle is not a commonly found one. Three comparable buckles are known to this writer, of 13th-or 14th century date. These forms of buckle appear to be a development from stylistically variable Romanesque/late Anglo-Saxon forms and demonstrate a persistent interest in such zoomorphic decoration and the symbolic value of felines. The attribution to Birnam is sufficient to show that it was probably lost on the S bank of the Tay, opposite Dunkeld, possibly during embarking or disembarking from one of several ferries that plied the Dunkeld stretch of the river.</p> <p>Claimed as Treasure Trove (TT.80/04) and allocated to Perth Museum &amp; Art Gallery. [1]</p>

<b>Value</b>	High
<b>Condition</b>	Unknown
<b>Description</b>	<p>The monument comprises the remains of a farmstead of medieval or later date, situated in mature forestry at about 110m OD.</p> <p>The farmstead comprises two main ranges of buildings at right angles to each other. The settlement is first mentioned in documents in 1566 and was deserted and in ruins by 1815.</p> <p>The area proposed for scheduling is triangular and measures a maximum of 60m from its northwesternmost point to its southeasternmost and 50m transversely, to include the visible remains of the farmstead and other features associated with its construction and use which are likely to survive in the vicinity, as marked in red on the attached map.</p> <p>The monument is of national importance as a well-preserved deserted farmstead, the importance of which is considerably increased by its well-documented history. It has considerable potential to enhance our understanding of agriculture and settlement in the late medieval and early modern period. [1]</p> <p>No additional information. [2]</p>

<b>Value</b>	Low
<b>Condition</b>	Unknown
<b>Description</b>	<p>The military road, in the form of a rough track, descends to the A984 on the bend opposite Newtyle farm. At NO 037 422 it branches off to the N again in the shape of a narrow, single-track tarmac road. It then descends into Dunkeld, crossing the main street, passing through the square and to the side of the cathedral (NO04SW 1.00) at NO 0237 4259. The road then utilises the ferry (NO04SW 54) to cross the River Tay to Inver at NO 0162 4240. The inn at Inver was a popular spot, as travellers would converge on it from Stirling and Edinburgh</p>

	<p>to cross the ferry, and Neil Gow used to play for guests here at the close of the eighteenth century. The military road shares the line of the B898 for approximately half a mile, before branching off to the S. It traverses the Craig Bhinean forest along a forest track which is now well-defined (1).</p> <p>NO 0499 4099 to NO 0271 4265 on line of present road.</p> <p>NO 0157 4243 to NO 0160 4234 poorly preserved cutting shown on rough river terrace. Maximum width 3.5m. Revetted on downward side to NE.</p> <p>NO 0160 4234 to NO 0156 4231 overlaid by private access road.</p> <p>NO 0156 4231 to NO 0155 4230 overlaid by private garden.</p> <p>NO 0155 4230 to NO 0154 4230 poorly preserved grass trackway 3.5m wide. Flanked by walls on N and S sides.</p> <p>NO 0154 4230 to NO 0146 4231 ill-preserved and partly tree-planted trackway 3.5m wide. Flanked by retaining wall on N side.</p> <p>NO 0146 4231 to NO 0114 4230 probable line of military road. No trace surviving.</p> <p>NO 0114 4230 to NO 0009 4168 on line of forestry road.</p> <p>NO 0008 4167 to NO 0004 4162 grass-overgrown trackway 3.5m wide. Flanked on NW by part wall, part fence. Flanked on S by plantation wall.</p> <p>NO 0004 4162 partially collapsed military culvert 3.5m wide (NN04SW 53.01). Now supports modern footbridge.</p> <p>NO 0003 4161 to NO 0000 4158 grass-overgrown trackway 3.5m wide.</p> <p>Visited by OS March and April 1975.</p> <p>No trace of military road. Modern road probably on line.</p> <p>Visited by OS (JM) 15 April 1975.</p> <p>There is a puzzling discrepancy between the report of the OS (JM), dated 15 April 1975, in which no trace of the military road is found, and the detailed observations on the field sheet, dated March and April 1975.</p> <p>Information from RCAHMS (MW) 24 November 1999.a</p> <p>Part of Wade's military road between Coupar Angus, Dunkeld and Amulree. This section of the road runs from NO 0499 4099 to NO 0000 4158. Taylor suggests the military road, in the form of a rough track, descends to the A984 on the bend opposite Newtyle farm. The OS suggest that the line of the military road is that of the modern road curving around Newtyle. At NO 037 422 it branches off to the N again in the shape of a narrow, single-track tarmac road. It then descends into Dunkeld, crossing the main street, passing through the square and to the side of the cathedral at NO 0237 4259. The road then utilises the ferry to cross the River Tay to Inver at NO 0162 4240. The military road shares the line of the B898 for approximately half a mile, before branching off to the S. It traverses the Craig Bhinean forest along a forest track which is now well-defined. [1]</p>

<b>Description</b>	<p>Some 300 yds W of the cathedral, the site of a windmill illustrated in 'Theatrum Scotiae'. It appears to have been a tower mill with four sails of the type common at this time (2,3).</p> <p>Slezer depicts a tower windmill at Dunkeld, although it is unclear from the perspective whether the mill stood on Bishop's Hill as is suggested by McLaren or on a spur 250m W of Dunkeld Cathedral (NO04SW 1.00). Within woodland on the tip of the latter feature, a spread of unmortared stones up to 9m in diameter possibly indicates its site. On the S the spur is cut by a hollowed trackway.</p> <p>Visited by RCAHMS (IMS) 5 April 1989. [1]</p>

<b>Description</b>	A bridge is said to have been built over the River Tay at Dunkeld in 1469. No trace of it remains. The foundations of a second bridge was laid in 1513 by Bishop Brown, 'near to his own palace', and it was continued and completed by Bishop Gavin Douglas. Part of the arch that sprung from the N bank is still entire, and when the river is low the piles on which the second and third arches were supported, were visible in the early 19th Century. It is not known when this bridge was destroyed(1,2,3). [1]

<b>Description</b>	<p>The Bishop's Palace originally consisted of several long thatched houses of two storeys. For greater security a castle was erected close to it in 1408, which comprised a great hall, vaulted granaries, etc. In 1508, a wing was added to the palace and, adjoining to it, a private chapel. Nothing now remains.</p> <p>New Statistical Account (NSA) 1842</p> <p>The grounds of the Cathedral have been landscaped, and except for a terrace locally believed to have housed a building at NO 0244 4254, and another slight scarp at NO 0233 4253, representing the E and S parts of a large levelled area, there is nothing to indicate the site of the Bishop's Palace nor of the other buildings noted in the NSA.</p> <p>There are no visible remains of the Bishop's Palace which is on record in the early 15th century; described as 'a rambling structure in the highland fashion', it is said to have stood to the SW of the Cathedral. Slezer, however, depicts a tower to the W of the Cathedral, probably that built by Bishop Robert de Cardeny (1398-</p>

	<p>1436) who is also credited with having built 'a hall with larder and granaries underneath'; these may have been within the tower, or could have been separate. Bishop George Brown (1483-1514) added a wing on the W and an oratory.</p> <p>The summit of Bishop's Hill is trapezoidal, 40m SW /NE by 27m at its widest, but this has been reduced by terraced tracks below the summit. A slightly sunken track, which crosses the summit SW / NE, is blocked by mature trees. This dissects several rectangular foundations at the SW end, the main one 17 x 6m, the second at 5m parallel is also 6m broad. The NE edge is an artificial scarp which the track crosses on a later causeway. Off-centre within the summit is a low oval mound 12 x 6m. In 1595 and 1616 there are references to 'lie muthill' here (RCAHMS accession 2008/47 and manuscript MS/5169), and it could indicate the castle erected near the Bishop's Place in 1408 (New Statistical Account). <b>Description</b>	<p>The monument consists of the nave, NW tower and S porch of the medieval cathedral of Dunkeld, together with the parkland immediately around it and an area to the N and W where the chanonry is known to have extended. The choir of the cathedral is excluded.</p> <p>The parts of the cathedral to be scheduled date from a period of late medieval building campaigns instigated by Bishop Cardeny in 1406. They consist of an aisled nave of seven bays, with a three-storeyed elevation, to which a S porch and NW tower were added by Bishop Lauder before 1483.</p> <p>Immediately around the cathedral is an area of enclosed parkland, while woodland to the W and parkland and farmland to the N covers the site of the chanonry, although the modern field called St Ninian's Croft also includes the site of Dunkeld House, built by Sir William Bruce for the Marquess of Atholl.</p> <p>The area to be scheduled includes the nave, S porch and NW tower of the cathedral, but excludes the choir, which acts as the modern parish church. The area to be scheduled also includes the enclosed parkland around the cathedral and part of the woodland to the W plus the E part of St Ninian's Croft to the N, where the chanonry once extended.</p> <p>The area is irregular on plan, with maximum (diagonal) dimensions of 450m NNE-SSW by 295m NW-SE, as marked in red on the accompanying map.</p> <p>The monument is of national importance because of its high architectural qualities as one of the most complete Scottish cathedrals, and because of the way in which its construction is documented in written accounts. It has important archaeological potential, not least because of this record which is capable of testing by excavation and analysis, to investigate the completeness of the documentary record. [1]</p> <p>(NO 0237 4259) Cathedral (NR) (Partly in ruins) Church (NAT) Site of Monastery (NR) Tower (NR) Standing Stone (NR) (Sculptured). OS 25", Perthshire, (1901).</p> <p>Dunkeld Cathedral, founded before 1337 (D E Easson 1957) on site of the Dark Age See of Alba before removal to St Andrews. (Information from C W Phillips, DA Index)</p> <p>The choir has been restored and is in use as the parish church. The cathedral possesses several sculptured stones, one which was used as a gatepost at the entrance to the churchyard, and now stands on the S side of the church close to it. Another, which was used as a tombstone of a farmer in 1729, afterwards formed part of the pavement floor of the cathedral. This latter part of a cross-shaft depicts a horse standing on its hind legs. It is illustrated by Stuart (25).</p> <p>Dunkeld Cathedral is partly under the care of the D o E and is open to the public. The nave is roofless but otherwise in good order, and the choir is now used as the parish church and is in the care of the Church of Scotland. It has no name, being part of the Cathedral, but is locally called the Cathedral Church. The sculptured stone formerly outside the S wall is now preserved inside the choir in the SE corner. Another sculptured stone depicting a horseman, and a hog-backed stone, are in the tower, but there is no trace of the one used as a tombstone in 1729.</p>

	<p>Visited by OS (AA) 17 April 1975</p> <p>Dunkeld has been an ecclesiastical centre since at least 848-9. At that time, Boethius' Scottish Chronicle records that Kenneth MacAlpin 'brought relics of Saint Columba to a church that he built', and, although the name of the church is not given, it is thought to have been at Dunkeld. Apparently, Kenneth intended that Dunkeld should be the primary centre of the church in eastern Scotland, although structural evidence for this early ecclesiastical centre is lacking. Nevertheless, two stones bearing Pictish carvings (NO04SW 1.04 and 1.09) and a large cross-slab (NO04SW 1.03) have been discovered here, and another stone bearing an incised horseman, now at the cathedral, comes from nearby (NO04SW 1.02). Although the ecclesiastical primacy of Dunkeld was subsequently transferred to St Andrews (by 943), some form of church community survived until the revival of the see by Alexander I (1107-24). Work on the present cathedral was not begun until the thirteenth century; the choir was completed in the fourteenth century and work extended to the nave in the fifteenth century. Between 1450 and 1475, the west tower, the south porch and the chapter-house were all added. The see was declared void in 1571 and the roof was removed from the church, but in 1691 the choir was renovated for use as the parish church. Notable monuments within the cathedral include: a coped medieval graveslab (NO04SW 1.05); an effigy of Bishop William Sinclair (14th century); the tomb-chart and effigy believed to be of the Wolf of Badenoch (died 1406) (NO04SW 1.08); and the tomb of Bishop Cardeny (died 1436) (NO04SW 1.09).</p> <p>Visited by RCAHMS (IMS) 9 February 1990.</p> <p>Two class I and one class II symbol stones.</p> <p>Architect: J.G.Lough memorial to Major General Sir Robt. <b>Description</b>	Within his cathedral, about 1420, Bishop Robert de Cardney (or Cardeny) founded and enclosed a chapel dedicated to St Ninian; he was interred in the chapel in 1436. Cardney's tomb (NO04SW 1.09) is in the S aisle of the nave and his chapel would seem to have occupied the two eastern bays of this aisle, probably to the E of an altar dedicated to St Katherine. [1]

<b>Description</b>	Wrought iron, probably mid 18th cent. Atholl Coronet and Cipher. Erected at Cathedral gate c. 1832, following demolition of Dunkeld House, abandonment of Dunkeld Palace and adaptation of St. Adammans (now demolished, S. of Cathedral) as a residence.  Newspaper cutting in Atholl Mss of Jan. 23 1884 states that these came from Nairne (demolished 1764, built c.1743-5). A handwritten note appended comments that this is an error and that prior to 1832 they stood at foot of Avenue near the Duchess's School (now restaurant) as Town Gate of Dunkeld House. <b>Description</b>	<p>2-storey and basement 5-window frontage harled with margins, later attic dormers and wooden porch; square rear stair tower. Mediaeval, remodelled to present form early 18th cent. Interiors of interest. [1]</p> <p>Dean's House (NR) OS 25" map (1866) The house of the Dean of Dunkeld is the oldest house in the town, and the only one now standing of three that escaped the fire of 1689. Its walls are of great thickness (2) 1842. This house, now known as Old Rectory House, is of no outstanding architectural value. see Illustration Card. It was remodelled to its present form in the early 18th c, and was the manse in 1823. (SDD 1963) Visited by OS (SFS) 5 March 1975. Dean's House is a 17th-century T-plan house which was remodelled to its present form in the early 18th century; it has two storeys, with five bays over a sunken basement, and there is a stair-turret to the rear. Internally, the only original feature seems to be an arched fireplace (chamfer-arrised) at ground-floor level. It is said to have been the only house to survive the fire of 1689. Visited by RCAHMS (IMS) 5 April 1989. [2]</p>

Type	Hospital
Designation	None
Scheduled Monument Reference	None
Listed Building Reference	None
HER Reference	MPK5441
Value	Low
Condition	Unknown
Description	<p>The hospital of St George was founded before 1506. George Browne, bishop of Dunkeld (1484-1514/5), revived and augmented an earlier foundation here (3).</p> <p>It survived the Reformation, but was destroyed by fire in 1689, and Bede House was built on the site. OS Name Book 1866</p> <p>No trace now remains of the original building.</p> <p>There are no visible remains of the hospital of St George, which is said to have stood on the site of 'The Ell House', at the corner of Cathedral Street and High Street. It is on record in 1506, but the foundation may be earlier as Bishop George Brown is credited with having augmented and revived an earlier hospital. From payments discharged in the granitar's accounts of Dunkeld, George Brown's hospital seems to have been of clay-bonded rubble construction and slated. It was burnt in 1689 but seems to have been replaced. In 1798, the hospital houses are recalled as 'low ruinous cottages'; these were demolished about 1750. [1]</p>

<b>Description</b>	The old stone cross was a round stone pillar on which were four round balls supporting a pyramidal top. It stood about 20ft high, the pedestal being 12ft square. On the pillar hung four iron "jongs" for punishing petty offenders.  The cross was extant before 1745, and removed c.1800.  Name Book 1865; NSA 1842  Dunkeld's mercat cross, removed about 1800, consisted of a circular shaft on a square pedestal, supporting four balls and a pyramid finial. The pedestal measured 3.66m square, and in height the cross measured about 6.1m. Attached were four iron 'jongs'.  New Statistical Account (NSA) 1845; OS Name Book. [1]

<b>Description</b>	Recent tree planting in what were once the grounds of Dunkeld House was thought to have affected underlying archaeological deposits, notably a 17th-century tower recorded at one time as holding the library. A team of NTS Conservation Volunteers assisted in an assessment of this threat. A trench across a prominent mound discovered this to be a landscape feature, but a second trench, located through the careful analysis of old maps and plans, led to the discovery of a wall trench and internal floor levels of what is thought to have been the tower. The trees affecting these deposits have now been removed, and it is hoped that funds can be found for a geophysical survey of the whole area. [1]

<b>Asset Number</b>	187
<b>Asset Name</b>	King's Seat
<b>NGR</b>	NO0083943006
<b>Type</b>	Fort
<b>Designation</b>	Scheduled Monument
<b>Scheduled Monument Reference</b>	1598
<b>Listed Building Reference</b>	None
<b>HER Reference</b>	None
<b>Value</b>	High
<b>Condition</b>	Good
<b>Description</b>	The monument comprises the substantial upstanding remains of a later prehistoric or early historic fort. This defended settlement survives as a series of up to four concentric ramparts and terraces, enclosing a central walled citadel on the summit of a craggy hill known as King's Seat. The fort occupies a commanding position overlooking the River Tay at approximately 150m above sea level, with excellent views to the north, south and west. The monument was first scheduled in 1960, but the documentation does not meet modern standards: the current rescheduling rectifies this.  The area to be rescheduled is a 'clipped' circle in shape, truncated along its NE and NW sides, to include the

	<p>remains described above and an area around them within which evidence relating to the monument's construction, use and abandonment may survive, as shown in red on the accompanying map. Specifically excluded from the scheduling are the upstanding remains of all later boundary features, including the stone walling and modern fencing, to allow for their maintenance.</p> <p>The fort is located in a naturally defensive position on a prominent hill, overlooking the River Tay and at the southern edge of the Highland boundary fault line. The maximum extent of the fort is defined by the outermost rampart which encloses an area approximately 180m by 140m. A central walled enclosure or citadel, measuring approximately 35m by 22m, is situated at the highest point of the hill and over its summit. The fort appears reasonably intact which, coupled with its remote location, suggests that the remains of occupation and related activities may survive relatively undisturbed. Up to four terraces and ramparts are formed around most of the western circuit of the fort, whilst around most of the NE, E and S sides, the steep craggy landform precludes any need for significant structural works. There is a break in the circuit at the N end of the monument, indicating the likely position of an entrance, from where a trackway drops down to a lower terrace on the west. There are traces of an enclosed terrace on the eastern side of the outermost circuit. One researcher has suggested there is also evidence of a circular enclosure 10m in diameter at the N end of the summit, but this area is obscured by vegetation and it cannot be determined on the ground today. In places the ramparts are up to four metres wide. Occasional stretches of internal quarry-scoops are visible along the western ramparts and terraces.</p> <p>Excavation of later prehistoric and early historic forts elsewhere has indicated the wealth of material that may be recovered from both the defensive works and the fort interior, relating to its construction, function, occupation and abandonment, as well as the prevailing environmental conditions and land uses at various times in its lifecycle. The presence of archaeological material may well extend beyond the visible extent of the fort, including structures, artefacts, palaeoenvironmental evidence and, possibly, human remains.</p> <p>This fort forms part of the woodland policies of Dunkeld House, whose designed landscape is included in the Inventory of Gardens and Designed Landscapes (although this area lies just outwith the boundary of the designated area). As a result the site has been planted with mature coniferous and deciduous trees and is overgrown with rhododendrons at its centre and along parts of its defence works. Today this woodland and shrubbery obscures much of the fort's structural and upstanding remains.</p> <p>Similar later prehistoric and early historic defended settlement sites are widely distributed across mainland eastern Scotland, especially south of the Firth of Forth, while isolated examples such as King's Seat occur elsewhere. King's Seat is not a particularly large example of its class. The comparatively low density of forts in this area, at least when viewed against the backdrop of their general distribution further south, suggests that sites such as this might have had increased significance as the strongholds of an elite element in the local population.</p> <p>Dunkeld emerged as the centre of Atholl in the early historic period, probably because of its prime geographical location at the foot of the Highland Edge, dominating the lines of communication northwards and westwards by way of the valley of the Tay, and marking the transition between fertile lowlands and more marginal upland. It has been suggested that the fort at King's Seat may have been the seat of royal power in Atholl during the early historic period. Its location just above the Roman legionary fortress and other Roman works at Inchtuthil may also be significant in this respect.</p> <p>Researchers have suggested that this site could be a seat of early historic royal power which originated as a prehistoric (earlier) tribal centre. The evidence of the place name, King's Seat, may support this.</p> <p>The site is partly surrounded (to the west, south and east) by the garden and designed landscape of Dunkeld House and lies within the woodland policies of Dunkeld House. The woodlands date largely from the mid 19th to early 20th century and it is likely that trees were planted around the fort in this period. Researchers have suggested that the modern form of the monument may in part be the product of landscape design works when the policies of Dunkeld House were laid out.</p> <p>This monument is of national importance because it has an inherent potential to make a significant contribution to our understanding of the past, in particular, the later prehistoric and early historic landscape of Scotland, and the economy and material wealth of the people of the time. Despite the presence of trees and rhododendrons, the field remains at King's Seat survive to a marked degree, which means there is probably high potential for the survival of structural, artefactual and ecofactual remains across the site. These can help us understand how and why the fort was built here, its layout and function, the activities of the people who used or lived in the fort, and their contacts with the wider world. Its loss would significantly diminish our ability to investigate these issues and would detract from the historic character of the Perthshire landscape. [1]</p> <p>No additional information. [2]</p>
